Introduction

Index Objective and Family

The index family currently consists of the S&P MILA Andean Indices¹ and the S&P MILA Pacific Alliance Indices.

S&P MILA Andean Indices. The S&P MILA Andean Indices consist of the following indices:

- **S&P MILA Andean 40.** The index measures the performance of stocks trading on the MILA platform that represent the Andean region (including Chile, Colombia, and Peru) and meet specific eligibility criteria for size and liquidity.
- **S&P MILA Andean Sector Indices.** These indices include the **S&P MILA Andean Financials** and **S&P MILA Andean Resources**. Index composition is derived from stocks in GICS^{®2} sub-industries within GICS[®] Financials sector (for S&P MILA Andean Financials) and GICS[®] Energy, Materials, and Consumer Staples sectors (for S&P MILA Andean Resources). Constituents must trade on the MILA platform, be members of the S&P Global BMI and meet all other eligibility requirements.

S&P MILA Pacific Alliance Indices. The S&P MILA Pacific Alliance Indices consist of the following indices:

- **S&P MILA Pacific Alliance Composite.** The index measures the performance of all stocks listed on MILA representing Chile, Colombia, Mexico and Peru that are also included in the S&P Global BMI. Sector and size indices are also available.
- **S&P MILA Pacific Alliance Select.** The index is a sub-index of the S&P MILA Pacific Alliance Composite, and measures the performance of stocks trading on MILA that meet specific eligibility criteria for size and liquidity.
- **S&P MILA Pacific Alliance Completion.** The index is a sub-index of the S&P MILA Pacific Alliance Composite that measures the performance of remaining stocks that are not members of the S&P MILA Pacific Alliance Select.

About MILA

The Mercado Integrado Latino Americano (MILA) platform is an integrated trading venture formed by the Colombia, Lima, Mexico, and Santiago Stock Exchanges. It is part of the economic and commercial integration effort among the Pacific Alliance member countries of Chile, Colombia, Peru and Mexico.

Additionally, for complete platform integration, and for ensuring smooth cross-border clearing and settlement, there is participation from the securities depositories – DCV from Chile, DECEVAL from Colombia, INDEVAL from Mexico and CAVALI from Peru. MILA was launched on May 30, 2011 with secondary equity trading through an intermediate routing mechanism and has plans to expand. For more information, visit <http://mercadomila.com/>.

¹ The S&P MILA 40, S&P MILA Financial and S&P MILA Resources were renamed effective July 14, 2014 to include the word “Andean” in the index name to more specifically describe the region they represent.

² The Global Industry Classification Standard (GICS[®]) was developed by and is the exclusive property of MSCI and S&P Dow Jones Indices. Global Industry Classification Standard (GICS[®]) is a service mark of MSCI and S&P Dow Jones Indices.

Supporting Documents

This methodology is meant to be read in conjunction with supporting documents providing greater detail with respect to the policies, procedures and calculations described herein. References throughout the methodology direct the reader to the relevant supporting document for further information on a specific topic. The list of the main supplemental documents for this methodology and the hyperlinks to those documents is as follows:

Supporting Document	URL
S&P Dow Jones Indices' Equity Indices Policies & Practices Methodology	Equity Indices Policies & Practices
S&P Dow Jones Indices' Index Mathematics Methodology	Index Mathematics Methodology
S&P Dow Jones Indices' Float Adjustment Methodology	Float Adjustment Methodology
S&P Dow Jones Indices' Global Industry Classification Standard (GICS) Methodology	GICS Methodology

This methodology was created by S&P Dow Jones Indices in agreement with MILA to achieve the aforementioned objective of measuring the underlying interest of each index governed by this methodology document. Any changes to or deviations from this methodology are made in the sole judgment and discretion of S&P Dow Jones Indices and MILA so that the indices continue to achieve their objectives.

Eligibility Criteria

Index Eligibility

The underlying universe for the S&P MILA Indices is all stocks in the S&P Global BMI that trade on MILA as domestic stocks. Non-domestic stocks of companies with at least 50% of assets or revenues in the MILA region are also eligible. In the case of the S&P MILA Sector Indices, stocks must also meet specific GICS sub-industry classifications.

Eligibility Factors

Market Capitalization. Stocks must meet the float-adjusted market capitalization thresholds as detailed in *Index Construction*, as of the rebalancing reference date.

Float-Adjustment. A stock's weight in an index is determined by its float-adjusted market capitalization. All strategic holdings are removed from the float-adjusted market capitalization.

Please refer to S&P Dow Jones Indices' Float Adjustment Methodology for a detailed description of float adjustment and Investable Weight Factor (IWF).

Liquidity. A stock's value traded is measured by combining local and North American liquidity, if available. North American exchanges refer specifically to the New York Stock Exchange, NASDAQ, and Toronto Stock Exchange. Constituents must meet the liquidity thresholds as detailed in *Index Construction*, as of the rebalancing reference date.

Listing. The indices use the local listing and/or the MILA listing for each constituent as described in *Index Construction*.

Eligible Securities. All common, investable and preferred shares (which are of an equity and not of a fixed income nature) are eligible for inclusion. Convertible stock, bonds, warrants, rights, and preferred stock that provide a guaranteed fixed return are not eligible.

S&P Dow Jones Indices believes turnover in index membership should be avoided when possible. At times, a company may appear to temporarily violate one or more of the addition criteria. However, the addition criteria are for addition to an index, not for continued membership. As a result, an index constituent that appears to violate criteria for addition to that index is not deleted unless ongoing conditions warrant an index change.

Multiple Share Classes

S&P MILA Andean 40, S&P MILA Andean Sector Indices and S&P MILA Pacific Alliance Select. Each company is represented once by the Designated Listing. For more information regarding the treatment of multiple share classes, please refer to Approach B within the Multiple Share Classes section of S&P Dow Jones Indices' Equity Indices Policies & Practices document.

S&P MILA Pacific Alliance Composite, Completion, Sector and Size Indices. All publicly listed multiple share class lines are eligible for index inclusion, subject to meeting the eligibility criteria. For more information regarding the treatment of multiple share classes, please refer to Approach A within the Multiple Share Classes section of S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Index Construction

S&P MILA Andean 40

Approaches. The S&P MILA Andean 40 employs a modified market capitalization-weighted scheme, using the divisor methodology used in all S&P Dow Jones Indices' equity indices.

The index uses a modified market capitalization-weighting scheme. Modifications are made to market capitalization weights, if required, to reflect available float, reduce country concentration and limit individual stock weights.

Constituent Selection. Constituent selection is as follows:

1. All constituents of the S&P Global BMI trading on MILA as domestic stocks representing the Andean region (i.e. Chile, Colombia, and Peru) comprise the initial selection universe.
2. All stocks with a float-adjusted market capitalization of less than US\$ 100 million and/or median three-month daily value traded of less than US\$ 250,000 are removed. In order to reduce turnover, S&P Dow Jones Indices maintains a buffer rule on constituent liquidity. At each rebalancing, if a stock is an existing constituent of the index, it will only be removed if its median three-month daily value traded is less than US\$ 150,000. As described in *Eligibility Criteria*, value traded is measured by combining volume traded in MILA and in North American exchanges. The remaining stocks form the Selection Universe.
3. If a company has multiple share classes, the share class with the lower liquidity is removed.
4. The remaining stocks are sorted in descending order of their float-adjusted market capitalization. The top 40 companies become index constituents subject to the constraint that there must be a minimum of five stocks per country. However, in order to reduce turnover, S&P Dow Jones Indices maintains a 50% buffer rule on constituent market capitalization. At each rebalancing, if a current index constituent's float-adjusted market capitalization has fallen below the top 40 but remains above the top 60, the security remains in the index.

If, in the ranking of the eligible universe, any particular country has fewer than five eligible companies from the top 60 stocks, the five largest companies for that market are chosen from the eligible universe. Therefore, some or all of the top five companies for this country may fall outside the top 60 ranked stocks. This is the only time stock selection may exceed the 50% buffer rule described above.

Constituent Weightings. At each rebalancing, no single stock's weight can exceed 8% in the index and no country can represent more than 50% of the index. Adjustments are made to constituents to achieve both of these goals.

For more information on the index calculation methodology, please refer to the Modified Market Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

S&P MILA Andean Sector Indices

Approaches. The S&P MILA Andean Sector Indices employ a modified market capitalization-weighted scheme, using the divisor methodology used in all S&P Dow Jones Indices' equity indices.

The selection of index constituents for each index – S&P MILA Andean Financials and S&P MILA Andean Resources – is based on its corresponding cluster requirement. The following tables define the GICS requirements of each cluster.

S&P MILA Andean Financials			
40101010	Diversified Banks	40203020	Investment Banking & Brokerage
40101015	Regional Banks	40203030	Diversified Capital Markets
40102010	Thriffs & Mortgage Finance	40301010	Insurance Brokers
40201020	Other Diversified Financial Services	40301020	Life & Health Insurance
40201030	Multi-Sector Holdings	40301030	Multi-line Insurance
40201040	Specialized Finance	40301040	Property & Casualty Insurance
40202010	Consumer Finance	40301050	Reinsurance
40203010	Asset Management & Custody Banks		

S&P MILA Andean Resources			
10101010	Oil & Gas Drilling	15103010	Metal & Glass Containers
10101020	Oil & Gas Equipment & Services	15103020	Paper Packaging
10102010	Integrated Oil & Gas	15104010	Aluminum
10102020	Oil & Gas Exploration & Production	15104020	Diversified Metals & Mining
10102030	Oil & Gas Refining & Marketing	15104025	Copper
10102040	Oil & Gas Storage & Transportation	15104030	Gold
10102050	Coal & Consumable Fuels	15104040	Precious Metals & Minerals
15101010	Commodity Chemicals	15104050	Steel
15101020	Diversified Chemicals	15105010	Forest Products
15101030	Fertilizers & Agricultural Chemicals	15105020	Paper Products
15101040	Industrial Gases	30202010	Agricultural Products
15101050	Specialty Chemicals	60101080	Specialized REITs (<u>only</u> Timber REITs are eligible)
15102010	Construction Materials		

Constituent Selection. Constituent selection is as follows:

1. All constituents of the S&P Global BMI trading on MILA as domestic stocks representing the Andean region (i.e. Chile, Colombia, and Peru) and categorized according to the corresponding clusters as detailed above comprise the initial selection universe.
2. All stocks with a float-adjusted market capitalization of less than US\$ 100 million and/or median three-month daily value traded of less than US\$ 250,000 are removed. In order to reduce turnover, S&P Dow Jones Indices maintains a buffer rule on constituent liquidity. At each rebalancing, if a stock is an existing constituent of the sector index, it will only be removed if its median three-month daily value traded is less than US\$ 150,000. As described in *Eligibility Criteria*, value traded is measured by combining volume traded in MILA and in North American exchanges. The remaining stocks form the Selection Universe.
3. If a company has multiple share classes, the share class with the lower liquidity is removed.

If, subsequent to the application of the criteria above, the resultant index contains fewer than two stocks from each of the eligible countries, the most liquid stocks from the wider cluster are added to ensure there is sufficient country representation.

The index seeks to include at least two stocks per country, whenever possible, given the index universe and eligibility rules.

Constituent Weightings. At each rebalancing, no single stock's weight can exceed 20% in the index and no country can represent more than 50% of the index. Additionally, the minimum initial portfolio size that can be turned over in a single day (based on recent trading volumes) cannot be lower than US\$ 20 million. For the purpose of applying this criterion, trading volumes include all shares traded on the MILA platform and on the North American exchanges, irrespective of the nature of the stock listing.

Constituent weights are determined through the optimization of the constraints above. If no optimal solution is found in this process, the constraint in relation to the minimum initial portfolio size is disregarded prior to optimization.

Adjustments are made to the constituents' market capitalization weights to achieve these goals.

For more information on the index calculation methodology, please refer to the Modified Market Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

S&P MILA Pacific Alliance Composite

Approaches. The S&P MILA Pacific Alliance Composite employs a float-adjusted market capitalization-weighted scheme, using the divisor methodology used in all S&P Dow Jones Indices' equity indices.

Constituent Selection. All constituents of the S&P Global BMI trading on MILA as domestic stocks are selected and form the index.

Constituent Weightings. Stocks in the index are weighted based on their float-adjusted market capitalization.

For more information on the index calculation methodology, please refer to the Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

S&P MILA Pacific Alliance Select

Approaches. The S&P MILA Pacific Alliance Select employs a modified market capitalization-weighted scheme, using the divisor methodology used in all S&P Dow Jones Indices' equity indices.

The index uses a modified market capitalization-weighting scheme. Modifications are made to market capitalization weights, if required, to reflect available float, reduce country concentration and limit individual stock weights.

Constituent Selection. Constituent selection is as follows:

1. All constituents of the S&P Global BMI trading on MILA as domestic stocks comprise the initial selection universe.
2. The requirements for index inclusion are a minimum float-adjusted market capitalization of US\$ 1 billion and a median six-month daily value traded of at least US\$ 1 million. Current constituents remain eligible for index inclusion if their float-adjusted market capitalization is at least US\$ 750 million and their combined domestic and North American median six-month daily value traded is at least US\$ 750,000. As described in *Eligibility Criteria*, value traded is measured by combining volume traded locally and in North American exchanges.
3. If a company has multiple share classes, the share class with the lower liquidity is removed.
4. All companies meeting the above criteria become index constituents subject to the constraint that there must be a minimum of five stocks per country.

If after step 3 any particular country has fewer than five companies, the five largest companies for that market are chosen from the eligible universe following step 1. Therefore, some or all of the top five companies for this country may fall outside the required criteria.

Constituent Weightings. At each rebalancing, no single stock's weight can exceed 8% in the index and no country can represent more than 50% of the index. In addition, the combined weight of stocks weighing 5% or more cannot be greater than 40%. The minimum initial portfolio size that can be turned over in a single day (based on the combined domestic and North American median six-month daily value traded) cannot be lower than US\$ 75 million.

If necessary, based on market conditions, the portfolio size used to calculate basket liquidity weight may be adjusted to achieve each of the weighting criteria.

For more information on the index calculation methodology, please refer to the Modified Market Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

S&P MILA Pacific Alliance Completion

Approaches. The S&P MILA Pacific Alliance Completion employs a float-adjusted market capitalization-weighted scheme, using the divisor methodology used in all S&P Dow Jones Indices' equity indices.

Constituent Selection. All constituents of the S&P MILA Pacific Alliance Composite that are not members of the S&P MILA Pacific Alliance Select form the index.

Constituent Weightings. Stocks in the index are weighted based on their float-adjusted market capitalization.

For more information on the index calculation methodology, please refer to the Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

S&P MILA Pacific Alliance Sector Indices

Approaches. The S&P MILA Pacific Alliance Sector Indices employ a float-adjusted market capitalization-weighted scheme, using the divisor methodology used in all S&P Dow Jones Indices' equity indices.

Constituent Selection. At each rebalancing, constituents of the S&P MILA Pacific Alliance Composite that are categorized according to the following GICS sectors, form each respective S&P MILA Pacific Alliance Sector Index.

- Consumer Discretionary
- Consumer Staples
- Energy
- Financials
- Health Care
- Industrials
- Information Technology
- Materials
- Telecommunication Services
- Utilities
- Real Estate

Constituent Weightings. Stocks in each index are weighted based on their float-adjusted market capitalization.

For more information on the index calculation methodology, please refer to the Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

S&P MILA Pacific Alliance Size Indices

Approaches. The S&P MILA Pacific Alliance Size Indices are subsets of the S&P MILA Pacific Alliance Composite and consist of the following indices:

- S&P MILA Pacific Alliance MidCap
- S&P MILA Pacific Alliance SmallCap
- S&P MILA Pacific Alliance MidSmallCap

Company size classification is determined using the S&P Global BMI's size methodology.

For information on the S&P Global BMI, please refer to the S&P Global BMI, S&P/IFCI Methodology available at www.spdji.com.

Constituent Weightings. At each rebalancing, the indices are weighted based on the float-adjusted market capitalization of their respective index constituents.

For more information on the index calculation methodology, please refer to the Capitalization Weighted Indices section of S&P Dow Jones Indices' Index Mathematics Methodology.

Index Maintenance

Rebalancing

S&P MILA Andean Indices. The indices are rebalanced semi-annually in March and September.

S&P MILA Pacific Alliance Indices. The S&P MILA Pacific Alliance Composite, Completion, Sector, and Size Indices are rebalanced quarterly in March, June, September, and December. The S&P MILA Pacific Alliance Select is rebalanced semi-annually in March and September.

The following table details each index's rebalancing reference and effective dates.

Index	Reference Dates (after close of business)	Effective Dates (after close of business)
S&P MILA Andean 40	Last trading day of February and August.	Last trading day of March and September.
S&P MILA Andean Sector Indices		
S&P MILA Pacific Alliance Composite	Five weeks prior to the effective rebalancing date for March, June, September and December.	Third Friday of March, June, September, and December.
S&P MILA Pacific Alliance Completion		
S&P MILA Pacific Alliance Sector Indices		
S&P MILA Pacific Alliance Size Indices		
S&P MILA Pacific Alliance Select	Third Friday of February and August.	Third Friday of March and September.

Additions. Except for spin-offs, companies can only be added to an index at the time of the rebalancing.

Deletions. Between rebalancings, deletions can occur due to acquisitions, mergers, takeovers, bankruptcies or delistings. For the S&P MILA Andean Sector indices and the S&P MILA Pacific Alliance Sector Indices, if an index constituent's GICS classification changes out of the eligible sub-industry classification, the company is removed at the next rebalancing.

Currency, Currency Hedged, and Risk Control Indices

The S&P MILA Andean Indices are calculated in U.S. dollars, Chilean pesos, Colombian pesos, and Peruvian new soles. With the exception of the S&P MILA Pacific Alliance Sector and Size Indices, the S&P MILA Pacific Alliance Indices are calculated in U.S. dollars, Chilean pesos, Colombian pesos, Mexican pesos and Peruvian new soles. The S&P MILA Pacific Alliance Sector and Size Indices are only calculated in U.S. dollars.

Real-time spot Forex rates, as supplied by Reuters, are used for ongoing index calculation of real-time indices.

WM/Reuters foreign exchange rates are taken daily at 4:00 PM London Time and used in the end-of-day calculation of the indices. These mid-market fixings are calculated by The WM Company based on Reuters data and appear on Reuters pages WMRA.

Additional currency, currency hedged, and risk control versions of the indices may be available. For a list of available currency, currency hedged, and risk control indices, please contact Client Services at index_services@spglobal.com.

For more information on currency, currency hedged, and risk control indices, please refer to S&P Dow Jones Indices' Index Mathematics Methodology.

Corporate Actions

S&P MILA Andean 40, S&P MILA Andean Sector Indices and S&P MILA Pacific Alliance Select.

The following table lists the most common corporate events affecting the indices on a daily basis, as well their treatment and divisor impact.

Corporate Action	Adjustment Made to Index	Divisor Adjustment?
Spin-off	Please refer to the Treatment of Spin-offs in S&P Dow Jones Indices' Equity Indices Policies & Practices document.	
Rights Offering	The price is adjusted to the Price of the Parent Company minus (the Price of the Rights Offering/Rights Ratio). Index Shares change so that the company's weight remains the same as its weight before the rights offering.	No
Stock Dividend, Stock Split, Reverse Stock Split	Index Shares are multiplied by and price is divided by the split factor.	No
Share Issuance, Share Repurchase, Equity Offering or Warrant Conversion	None.	No
Special Dividends	Price of the stock making the special dividend payment is reduced by the per share special dividend amount after the close of trading on the day before the dividend ex-date.	Yes
Constituent Change	There are no intra-rebalancing additions.	-
	Deletions due to delistings, acquisition or any other corporate event resulting in the deletion of the stock from the index will cause the weights of the rest of the stocks in the index to change. Relative weights will stay the same.	Yes

S&P MILA Pacific Alliance Composite, Completion, Sector and Size Indices. The corporate action treatment for the indices follow that of the underlying S&P Global BMI country indices.

For more information, please refer to the S&P Global BMI, S&P/IFCI Methodology at www.spdji.com.

For more information on Corporate Actions, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Investable Weight Factor (IWF)

All issues in the indices are assigned a float factor, called an Investable Weight Factor (IWF). The IWF ranges between 0 and 1 and is an adjustment factor that accounts for the publicly available shares of a company.

Please refer to S&P Dow Jones Indices' Float Adjustment Methodology for details.

Other Adjustments

In cases where there is no achievable market price for a stock being deleted, it can be removed at a zero or minimal price at the Index Committee's discretion, in recognition of the constraints faced by investors in trading bankrupt or suspended stocks.

Base Dates and History Availability

Index history availability, base dates and base values are shown in the table below.

Index	Launch Date	First Value Date	Base Date	Base Value
S&P MILA Andean 40	08/29/2011	03/30/2001	03/30/2001	100
S&P MILA Andean Financials	08/29/2011	03/30/2007	03/30/2007	100

S&P MILA Pacific Alliance MidSmallCap	10/03/2016	03/30/2001	03/30/2001	100

Index Data

Calculation Return Types

S&P Dow Jones Indices calculates multiple return types which vary based on the treatment of regular cash dividends. The classification of regular cash dividends is determined by S&P Dow Jones Indices.

- Price Return (PR) versions are calculated without adjustments for regular cash dividends.
- Gross Total Return (TR) versions reinvest regular cash dividends at the close on the ex-date without consideration for withholding taxes.
- Net Total Return (NTR) versions, if available, reinvest regular cash dividends at the close on the ex-date after the deduction of applicable withholding taxes.

In the event there are no regular cash dividends on the ex-date, the daily performance of all three indices will be identical.

For a complete list of indices available, please refer to the daily index levels file (“.SDL”).

For more information on the classification of regular versus special cash dividends as well as the tax rates used in the calculation of net return, please refer to S&P Dow Jones Indices’ Equity Indices Policies & Practices document.

For more information on the calculation of return types, please refer to S&P Dow Jones Indices’ Index Mathematics Methodology.

Index Governance

Index Committee

The indices are maintained by the S&P/MILA Index Committee. The Index Committee meets semi-annually. All committee members are full-time professional members of S&P Dow Jones Indices' staff and one member from each of the markets representing MILA. At each meeting, the Index Committee may review pending corporate actions that may affect index constituents, statistics comparing the composition of the indices to the market, companies that are being considered as candidates for addition to an index, and any significant market events. In addition, the Index Committee may revise index policy covering rules for selecting companies, treatment of dividends, share counts or other matters.

S&P Dow Jones Indices considers information about changes to its indices and related matters to be potentially market moving and material. Therefore, all Index Committee discussions are confidential.

S&P Dow Jones Indices' Index Committees reserve the right to make exceptions when applying the methodology if the need arises. In any scenario where the treatment differs from the general rules stated in this document or supplemental documents, clients will receive sufficient notice, whenever possible.

In addition to its daily governance of indices and maintenance of index methodologies, at least once within any 12-month period, the Index Committee reviews this methodology to ensure the indices continue to achieve the stated objectives, and that the data and methodology remain effective. In certain instances, S&P Dow Jones Indices may publish a consultation inviting comments from external parties.

For information on Quality Assurance and Internal Reviews of Methodology, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Index Policy

Announcements

All index constituents are evaluated daily for data needed to calculate index levels and returns. All events affecting the daily index calculation are typically announced in advance via the Index Corporate Events report (.SDE), delivered daily via ftp to all clients. Any unusual treatment of a corporate action or short notice of an event may be communicated via email to clients.

Index methodology is constantly under review for best practices, and any changes are announced well ahead of time via the Web site and email to all clients.

For more information, please refer to the Announcements section of S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Pro-forma Files

In addition to the corporate events file (.SDE), S&P Dow Jones Indices provides constituent pro-forma files each time the indices rebalance. The pro-forma file is typically provided daily in advance of the rebalancing date and contains all constituents and their corresponding weights and index shares effective for the upcoming rebalancing.

Please visit www.spdji.com for a complete schedule of rebalancing timelines and pro-forma delivery times.

Holiday Schedule

The indices are calculated daily, throughout the calendar year, provided at least one MILA stock exchange is open and trading.

A complete holiday schedule for the year is available at www.spdji.com.

Rebalancing

The Index Committee may change the date of a given rebalancing for reasons including market holidays occurring on or around the scheduled rebalancing date. Any such change will be announced with proper advance notice where possible.

Unexpected Exchange Closures

For information on Unexpected Exchange Closures, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Recalculation Policy

For information on the recalculation policy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Real-Time Calculation

Real-Time, intra-day, index calculations are executed for certain indices. Real-time indices are not restated.

For information on Calculations and Pricing Disruptions, Expert Judgment and Data Hierarchy, please refer to S&P Dow Jones Indices' Equity Indices Policies & Practices document.

Appendix

Methodology Changes

Methodology changes since January 1, 2015 are as follows:

Change	Effective Date (After Close)	Methodology	
		Previous	Updated
S&P MILA Pacific Alliance Select: Rebalancing Reference Date	09/15/2017	Last trading day of February and August.	Third Friday of February and August.
S&P MILA Andean 40 and S&P MILA Andean Sector Indices: Constituent Selection	09/30/2016	All stocks with a float-adjusted market capitalization of less than US\$ 100 million and/or average three-month daily value traded of less than US\$ 250,000 are removed. In order to reduce turnover, S&P Dow Jones Indices maintains a buffer rule on constituent liquidity. At each rebalancing, if a stock is an existing constituent of the index, it will only be removed if its average three-month daily value traded is less than US\$ 150,000.	All stocks with a float-adjusted market capitalization of less than US\$ 100 million and/or median three-month daily value traded of less than US\$ 250,000 are removed. In order to reduce turnover, S&P Dow Jones Indices maintains a buffer rule on constituent liquidity. At each rebalancing, if a stock is an existing constituent of the index, it will only be removed if its median three-month daily value traded is less than US\$ 150,000.
S&P MILA Pacific Alliance Select: Constituent Weightings	09/16/2016	At each rebalancing, no single stock's weight can exceed 8% in the index and no country can represent more than 50% of the index. In addition, the combined weight of stocks weighing 5% or more cannot be greater than 40%.	At each rebalancing, no single stock's weight can exceed 8% in the index and no country can represent more than 50% of the index. In addition, the combined weight of stocks weighing 5% or more cannot be greater than 40%. The minimum initial portfolio size that can be turned over in a single day (based on the combined domestic and North American median six-month daily value traded) cannot be lower than US\$ 75 million.
S&P MILA Pacific Alliance Select: Constituent Weightings	12/18/2015	At each rebalancing, no single stock's weight can exceed 8% in the index and no country can represent more than 50% of the index. Adjustments are made to constituents to achieve both of these goals.	At each rebalancing, no single stock's weight can exceed 8% in the index and no country can represent more than 50% of the index. In addition, the combined weight of stocks weighing 5% or more cannot be greater than 40%. Adjustments are made to constituents to achieve these goals.
Additions	09/30/2015	No companies are added to the indices between rebalancings. Index additions are only made during scheduled rebalancings.	Except for spin-offs, companies can only be added to an index at the time of the rebalancing.

These trademarks together with others have been licensed to S&P Dow Jones Indices LLC. Redistribution, reproduction and/or photocopying in whole or in part are prohibited without written permission. This document does not constitute an offer of services in jurisdictions where S&P Dow Jones Indices LLC, Dow Jones, S&P or their respective affiliates (collectively "S&P Dow Jones Indices") do not have the necessary licenses. All information provided by S&P Dow Jones Indices is impersonal and not tailored to the needs of any person, entity or group of persons. S&P Dow Jones Indices receives compensation in connection with licensing its indices to third parties. Past performance of an index is not a guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. S&P Dow Jones Indices does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P Dow Jones Indices makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other investment product or vehicle. S&P Dow Jones Indices LLC is not a tax advisor. A tax advisor should be consulted to evaluate the impact of any tax-exempt securities on portfolios and the tax consequences of making any particular investment decision. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.

S&P Global keeps certain activities of its various divisions and business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain non-public information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate or otherwise address.

The Global Industry Classification Standard (GICS®) was developed by and is the exclusive property and a trademark of Standard & Poor's and MSCI. Neither MSCI, Standard & Poor's nor any other party involved in making or compiling any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, Standard & Poor's, any of their affiliates or any third party involved in making or compiling any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

In countries within the global territory other than Chile, MILA is a trademark of Bolsa de Valores de Colombia, S.A, Bolsa de Valores de Lima and Bolsa de Comercio de Santiago. In Chile, MILA is a trademark of Bolsa de Comercio de Santiago and Deposito Central de Valores. This mark has been licensed for use by S&P Dow Jones Indices.
