S&P - Índices de Renta Variable de América Latina: Comentarios del segundo trimestre de 2018

El segundo trimestre de 2018 mostró que la volatilidad reina en América Latina. El primer trimestre presentó rendimientos sólidos para la región, con México a la zaga. Sin embargo, en este segundo trimestre, esos resultados positivos prácticamente desaparecieron para lo que va del año y América Latina regresó a territorio negativo. Las recientes elecciones presidenciales en México y Colombia, así como las próximas elecciones en Brasil, han generado incertidumbre a nivel económico. Brasil, que es el mayor mercado de la región, tuvo un segundo trimestre considerablemente difícil. Durante este periodo, el país experimentó una significativa depreciación de su moneda, alzas en las tasas de inflación, al igual que desafíos fiscales y políticos que en gran parte contribuyeron al desplome de la región. Durante el segundo trimestre, el S&P Brazil BMI tuvo una caída de 26% medido en dólares (USD), mientras que los índices regionales S&P Latin America BMI y S&P Latin America 40 retrocedieron 18% y 19%, respectivamente.

Es indiscutible que América Latina está pasando por grandes dificultades. Sin embargo, en cuanto a los índices, uno de los factores que ha tenido mayor impacto ha sido la fluctuación del cambio de la moneda. Todos los índices locales y regionales presentaron caídas abruptas en su desempeño al observar sus rendimientos medidos en dólares (USD), mientras que los inversionistas locales encontraron un panorama diferente en la región. Un buen ejemplo de esto es el S&P MILA Pacific Alliance Composite, índice que excluye a Brasil. La región amplia de 141 acciones presentó rendimientos de -5% en dólares durante el trimestre, sin embargo, en pesos chilenos y mexicanos, los rendimientos fueron positivos: 2.7% y 2.5%, respectivamente. En pesos colombianos, el índice no presentó variaciones (0.1%) y en nuevos soles peruanos, registró un descenso de 3%. Esto demuestra que, dependiendo del país, el cambio de la moneda juega un papel importante en el desempeño del índice.

A pesar de este bajo desempeño, se registraron algunos resultados positivos, especialmente en México y Colombia. Los indicadores S&P/BMV IPC y S&P Colombia Select exhibieron un desempeño sólido en moneda local, generando rendimientos de 4.4% y 10.4%, respectivamente. Otro segmento en el que se registraron resultados positivos fue el sector de energía de la región de la Alianza del Pacífico,¹ que presentó rendimientos cercanos a 4% durante el trimestre y de 64% en lo que va del año (hasta junio de 2018), medidos en dólares.

La volatilidad es el factor más importante en América Latina y será interesante ver lo que ocurre el próximo trimestre. Hasta ahora, las elecciones presidenciales en México casi no han tenido impacto en el mercado y, en la primera semana de julio, Brasil regresó a territorio positivo. No obstante, son muchas las semanas que quedan hasta el próximo trimestre. Manténganse atentos a las novedades.

¹ La región de la Alianza del Pacífico incluye a Chile, Colombia, México y Perú.

The S&P MILA Pacific Alliance Midcap, Smallcap and Midsmallcap Indices were launched October 3, 2016.

All information presented prior to the index launch date is back-tested. All information presented prior to an index's Launch Date is hypothetical (back-tested), not actual performance. The back-test calculations are based on the same methodology that was in effect on the index Launch Date. Complete index methodology details are available at www.spdji.com.

S&P Dow Jones Indices defines various dates to assist our clients in providing transparency. The First Value Date is the first day for which there is a calculated value (either live or back-tested) for a given index. The Base Date is the date at which the Index is set at a fixed value for calculation purposes. The Launch Date designates the date upon which the values of an index are first considered live: index values provided for any date or time period prior to the index's Launch Date are considered back-tested. S&P Dow Jones Indices defines the Launch Date as the date by which the values of an index are known to have been released to the public, for example via the company's public website or its datafeed to external parties. For Dow Jones-branded indices introduced prior to May 31, 2013, the Launch Date (which prior to May 31, 2013, was termed "Date of introduction") is set at a date upon which no further changes were permitted to be made to the index methodology, but that may have been prior to the Index's public release date.

Past performance of the Index is not an indication of future results. Prospective application of the methodology used to construct the Index may not result in performance commensurate with the back-test returns shown. The back-test period does not necessarily correspond to the entire available history of the Index. Please refer to the methodology paper for the Index, available at www.spdji.com for more details about the index, including the manner in which it is rebalanced, the timing of such rebalancing, criteria for additions and deletions, as well as all index calculations.

Another limitation of using back-tested information is that the back-tested calculation is generally prepared with the benefit of hindsight. Back-tested information reflects the application of the index methodology and selection of index constituents in hindsight. No hypothetical record can completely account for the impact of financial risk in actual trading. For example, there are numerous factors related to the equities, fixed income, or commodities markets in general which cannot be, and have not been accounted for in the preparation of the index information set forth, all of which can affect actual performance.

The Index returns shown do not represent the results of actual trading of investable assets/securities. S&P Dow Jones Indices LLC maintains the Index and calculates the Index levels and performance shown or discussed, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. As a simple example, if an index returned 10% on a US \$100,000 investment for a 12-month period (or US \$10,000) and an actual asset-based fee of 1.5% was imposed at the end of the period on the investment plus accrued interest (or US \$1,650), the net return would be 8.35% (or US \$8,350) for the year. Over a three year period, an annual 1.5% fee taken at year end with an assumed 10% return per year would result in a cumulative gross return of 33.10%, a total fee of US \$5,375, and a cumulative net return of 27.2% (or US \$27,200).

S&P Dow Jones Indices receives compensation in connection with licensing its indices to third parties. Past performance of an index is not a guarantee of future results.

It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. S&P Dow Jones Indices does not sponsor, endorse, sell, promote or manage any investment fund or other investment vehicle that is offered by third parties and that seeks to provide an investment return based on the performance of any index. S&P Dow Jones Indices makes no assurance that investment products based on the index will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment advisor, and S&P Dow Jones Indices makes no representation regarding the advisability of investing in any such investment fund or other investment vehicle. A decision to invest in any such investment fund or other investment vehicle should not be made in reliance on any of the statements set forth in this document. Prospective investors are advised to make an investment in any such fund or other vehicle only after carefully considering the risks associated with investing in such funds, as detailed in an offering memorandum or similar document that is prepared by or on behalf of the issuer of the investment fund or other vehicle. Inclusion of a security within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, nor is it considered to be investment advice.
